I am writing to encourage and celebrate the proposed plan, and to strongly request that you do not budge and modify the plan based on commercial interests' input. This waterway is critical for the health of our waterways, for indigenous practices, to improve the health of our local food systems and ecological systems, and because it is just the right thing to do. Please do not cave or modify this plan in the interest of the companies that are currently polluting and don't want to change their toxic ways!
